Ejemplos de gestión de eventos en JavaScript

Departamento de LSI

Juanan Pereira <juanan.pereira@ehu.es>

Gestionar el evento: onclick

Gestionar el evento: onclick

```
function inicializarGestores()
{
    var imagen = document.getElementById("imagen");
    imagen.onclick = function()
    {
        alert("Has pulsado la imagen");
    }
}
```

```
window.onload = inicializarGestores;
```

Gestionar eventos: onblur, onfocus

Gestionar eventos: onblur, onfocus

```
var usuario = document.getElementById("usuario");  
usuario.value = 'tu@email';
```

```
usuario.onblur = function(){  
    if (usuario.value == ""){  
        usuario.value = "tu@email";  
    }  
}  
usuario.onfocus = function(){  
    if (usuario.value == 'tu@email'){  
        usuario.value = "";  
    }  
}
```

Gestionar eventos: onchange

Second Menu' Lipsum Lorem

Select a recipe ▼

Gestionar eventos: onchange

```
var item = document.getElementById("combobox");  
item.addEventListener("change",gestorCombo);
```

```
function gestorCombo(){  
    console.log(item.value);  
    console.log(item.selectedIndex);  
    console.log(item.options[item.selectedIndex].text);  
}
```

→ rice

→ 2

→ Rice with mushrooms

```
<select name="GoMenu" style="width:159px" id="combobox">  
  <option selected="selected">Select a recipe</option>  
  <option class="_self" value="spaghetti">Spaghetti with aubergine</option>  
  <option class="_self" value="rice">Rice with mushrooms</option>  
  <option class="_self" value="rolls">Rolls with polenta</option>  
  <option class="_self" value="chicken">Chicken Hunter</option>  
  <option class="_self" value="tortiglioni">Tortiglioni filled</option>  
  <option class="_self" value="swordfish">Smoked swordfish</option>  
  <option class="_self" value="pumpkins">Stuffed pumpkins</option>  
</select>
```

Gestionar eventos: onsubmit

Gestionar eventos: onsubmit

```
var formulario = document.getElementById('formulario');  
formulario.onsubmit = function(){  
    console.log("click en submit");  
    // validar campos. Si alguno está sin cumplimentar  
    // devolver false. En caso contrario, devolver true  
    return false;  
}
```

Gestionar eventos: onchange

```
<form>  
  <input type="range" min=1 max=100 step=1 id="rango">  
</form>
```

Gestionar eventos: onchange

```
var cargarGestores = function(){  
    var rango = document.getElementById("rango");  
    rango.addEventListener('change', function(){mostrarValor(rango, "valor")});  
  
    mostrarValor(rango, "valor");  
  
    function mostrarValor(range, capa){  
        document.getElementById(capa).innerHTML = range.value;  
    }  
}  
  
window.onload = cargarGestores;
```

Gestionar eventos: setTimeout, setInterval

Ejecutar la función escribir() cada 5 segundos:

```
function escribir() {  
    console.log("Escribiendo...." + new Date());  
}  
var reloj = setInterval(escribir, 5000);
```

milisegundos

Ejecutar la función escribir() dentro de 5 segundos:

```
function escribir() {  
    console.log("Escribiendo...." + new Date());  
}  
var reloj = setTimeout(escribir, 5000);
```

milisegundos
